## Are You Prepared for the Future?

### Attic Air Sealing | Insulation Retrofit Training

#### Is your current business model air tight?

Is it sustainable, able to weather the current economic storm? Experts predict that as the home building industry changes, contractors will need to update their skill sets to successfully adapt to the future of our industry.

#### The Training

Greenfiber is offering a program tailored to contractors who are seeking to expand their business into the growing **Retrofit/Weatherization** market. Our training is designed to meet the following standards:

- DOE's Weatherization Assistance Program
- EPA's Home Performance with Energy Star
- Building Performance Institute (BPI)  
- Attic Air Sealing & Insulation\*

Our training is comprised of four modules:

1. Attic air sealing
2. Duct sealing
3. Attic insulating
4. Retrofit side wall insulating

The majority of government funded energy rebate programs specify attic air sealing and insulation retrofit as a key energy improvement measure.

In order to provide the contractor with a system which will assure consistent assessment, job instruction, quality assurance and process

improvement, Greenfiber trainers are certified to teach Advanced Energy's "House Characterization" program.

#### Who Should Attend

Our "Train the Trainer" program is specifically designed for:

- Team Leader
- Supervisor
- Quality Control
- Crew Leader

Greenfiber's program offers industry leading hands-on instruction providing a comprehensive instructional toolbox that provides repeatable, testable training for all crew members.

#### Attendees Will Receive:

- Documented Processes
- Money Saving Procedures
- Evaluation Procedures and Test Forms
- Certificate of Completion

#### Limited spaces - Sign up today!

*"I think more than ever during these challenging times, we at Kinzler Construction Services are working on opportunities in our business. Understanding future market demands, building science trends and new business models while keeping our people trained with the latest information and skills is a big part of our mission."*

- Kevin Kinzler, Kinzler Construction Services
