

# Greenfiber® Machine Preparation

## MACHINE HANDLING

### What is Needed:

- Pickup truck
- Two people

### How to Load:

- Position one person on each side of the machine
- Each person bends with their knees and places hands underneath the front lip on either end
- Carefully stand up and lift the machine onto the front of the tailgate (machine weighs 100-160 lbs)
- Slide the machine toward the middle of the truck bed from the tailgate
- Tie down or secure the machine

### How to Unload:

- Position one person on each side of the machine
- Slide it toward the front of the tailgate
- Carefully lower the machine to the ground before bending down to lift and carry to a flat level surface

## PARTS & MATERIALS

### Make Sure You Have These Included Machine Parts Before You Leave the Store:

- Two 50' hoses
- One steel tube connector
- Three clamps

Coupler

Hose Section

Clamps

### Gather Your Materials:

- Heavy-duty 12-gauge extension cord
